Boston O. 3-22-02

Mr. Boody

There is a case of Diptheria here in Boston and the people that are exposed to it are mingling with others and I think that it should be prevented if there is any way out of it.

Yours &c N. B. Wise

The Board of Trustees deputised Chas. M. Petersen to go to Boston and investigate said complaint and report to said board and also notify inmates of said quarantined house that they must observe the quarantine ~~laws~~ regulations.

The Trustees acting as a Board of Health met all members being present. Member J. Blackburn having been notified on the evening of Sunday May 5 inst. by Dr. G. C. Radcliffe that contagious disease in the form of small pox existed at the home of one Duncan (colored) on the farm owned by Geo. F. and H. T. Mackey on the Oak Hill road, he, Blackburn had met member N. Knapp and the Township Clerk on the morning of this day, May 6-1907 and Knapp had proceeded at once to the house containing said contagious disease and placed small pox placard on same and notified the occupants not to leave the premises nor permit any person to enter (except attending physician)

He Knapp also arranged with J. P. Noland to carry provision or supplies that may be needed to the affected family

Inquiry was made as to probable exposures to the contagion having occurred and as no known instances could be learned, the Board of Health decided to have the physician visit the homes of all who had attended the school in that district where the affected ones had been in attendance and vaccinate all who possibly may have been exposed.

The matter of guards to prevent entrance to or exit from the premises was discussed but was not deemed advisable as the family and neighbors gave assurance that the quarantine would not be violated. The district being sparsely settled the danger of spread of the contagion was not considered great.

The meeting was adjourned subject to the call of the clerk or any member of the board
